

Endeavour TrawlerCat 44

A Statement of Excellence

The Salon

Step down the companionway into this salon and you'll be astonished by its spaciousness. No other narrow beam catamaran can boast such a spacious and comfortable salon for entertaining guests or just relaxing. The interior layout has been designed with the most efficient use of space of any vessel on the market, easily 30% more living space and 35% more storage space than any other vessel of equal length.

No more crowding around the salon table on this yacht. The TrawlerCat 44's salon has plenty of room for all your guests. And how many yachts have room to hang a painting of this size? This is one yacht that you can make your home...or second home. Comfortable, spacious and luxurious, yet it's very easy to maintain. The teak and holly flooring gives this thoroughly modern salon the look of a traditional luxury yacht.

The port side has another settee with an open backrest, allowing visual contact and conversation with those in the galley. The placement of hatches and the wide, fixed windows keeps the salon bright with natural light during the day. Visibility is excellent. And with a minimum interior height of 6 1/2 feet, the TrawlerCat 38 stands head and shoulders above other yachts its size.

The beautiful salon table can be expanded in every direction. It can be raised, lowered and opened into any number of convenient configurations, depending on your needs. This versatile, custom made table converts from a small coffee table, to a medium sized dining table and keeps unfolding into a truly huge dining table, large enough to sit for eight or nine with additional chairs.

If you don't need three staterooms you can opt for the full salon. By adding the space of the forward stateroom to the salon, you get even more lounging space to spread out and makes the yacht feel even larger. The forward end of the salon can now be used as an entertainment center with room for a full sized TV, or even a big screen TV, DVD and VCRs, satellite receivers, etc. And to the right of the TV there's room for yet another storage cabinet or a desk that can be used for an inside navigation station, computer desk or just a work desk.

The Galley

The TrawlerCat 44 is available with two galley options. You can have your galley on the upper level adjacent to the salon, or you can choose to have your galley in the port hull. It's a personal preference and the choice is yours. Either way you get a first class galley, capable of preparing gourmet meals for you and your guests.

The galley up arrangement keeps those on kitchen duty right in the middle of all the activities in the salon. For those used to having a wide open kitchen, this arrangement may be for you.

With the bi-level galley, all of the kitchen work is out of the salon area and it makes the salon that much larger. We call this a bi-level galley because it offers the best of both worlds. Your upper body is still open to the salon so that you're able to converse with guests in the salon while keeping your dirty dishes and kitchen prep out of sight.

The bi-level galley does afford more work area and storage than the galley up option. There are cupboards and drawers on both sides of the galley. And plenty of room for two, or even three people to work together without getting in each other's way.

The Staterooms

The Master Suite is located on the upper level, just forward of the salon. It has a queen size bed, a hanging closet, drawers and shelves for books, videos, and even a space already wired for an optional TV/VCR. The large fixed window floods the room with natural light. Two overhead hatches let the breezes flow in and screens keep the bugs out.

If you opt for the full width, beam-to-beam master stateroom, you'll have a laundry/dressing room to port, with even more storage, a vanity and room for the optional clothes washer/dryer and fold-away ironing board. To starboard is the owner's head, accessible only from the master stateroom.

There are identical guest staterooms fit for a queen located aft in each hull. Each stateroom has a dressing area and a hanging closet with drawers beneath. There is plenty of room for everything to have its place. Large opening ports with screens let the breezes flow through and the optional 12 volt fans keep the air moving even when the air outside is still. With the staterooms in opposite corners of the boat, you have the utmost privacy for yourself and for your guests.

The Heads

EndeavourCats are known for having bright, functional, well ventilated heads with large, separate shower stalls. The EndeavourCat 44 carries on this tradition in a big way. This spacious yacht has two fully equipped heads. The owner's private head, accessible only from the owner's stateroom has a full size shower stall all the amenities you'd expect to find in a luxury yacht.

The guest head is comparably equipped with Corian sinks, Gibraltar counter tops and high-polish, stainless steel fixtures, and of course, another shower stall.

The Cockpit

The cockpit of the TrawlerCat 44 is like a second salon. Its huge size makes it ideal for entertaining. The cockpit is covered by a fixed hardtop, and with the optional side curtains, this sun-room is protected from weather and insects. The expandable cockpit table will comfortably seat up to eight. Even expanded to full size, it's never in the way because there are port, starboard and aft exits from the cockpit.

The steering station is laid out for visibility and convenience. All controls are right at hand. There's ample space for any instrument you could ever want, even the popular large screen radars and chart plotters. Weather protection is very good under any conditions.

The Engines

The Endeavour TrawlerCat 44 is powered by twin 240 hp turbo diesels. These silky smooth engines push this trawler along at 16 knots. Economical cruising speed is about 7 to 8 knots. At this speed, the total fuel consumption for both engines is 3 to 4 gallons per hour. If time requires that you move more quickly, you can

cruise comfortably at 15-16 knots and burn 13 gallons per hour.

Engines are located under the bunks in the aft staterooms. Access for service is excellent. In addition to the door in front of the engine, the whole top of the engine compartment lifts off and there is actually enough room to stand in the engine compartment while you service them. Strainers for engine cooling and for the optional central air-conditioning is located under the sole.
